Educational Qualifications

PhD University of the Free State, South Africa 2014
MSc National University of Science and Technology, Zimbabwe 2000

Professional Qualifications

Jan 1990 - Dec 1992 Institute of Chartered Secretaries and Administrators in Zimbabwe (ICSAZ) Intermediate Certificate, Zimbabwe.

Professional Experience

Oct 2015 - Present Senior lecturer, Department of Mathematical and Computational Sciences
University of Venda.

Jun 2018 - Feb 2020 Board Member of the Institute of Certificated and Chartered Statisticians
of South Africa (ICSSA).
<https://iccssa.org.za/wp-content/uploads/2019/08/ICSSA-Recognition-of-Prior-Learn>

Oct 2015 - 2018 Honorary Research Associate, School of Statistics and Actuarial Science
University of the Witwatersrand, South Africa.

Sep 2013 - Sep 2015 Lecturer, School of Statistics and Actuarial Science, University of the
Witwatersrand, South Africa.

May 2009 - Aug 2013 Lecturer, Department of Statistics and Operations Research, University
of Limpopo, South Africa.

Apr 2002 - Apr 2009 Lecturer, Department of Applied Mathematics, National University of Science
and Technology, Zimbabwe.

Jan 2000 - Dec 2008 Part-time lecturer, Zimbabwe Open University, Zimbabwe.

Academic Citizenship, Committees and Administrative Duties

- University research advisory forum committee member.
- Non-examining chairperson of the departmental higher degrees committee.
- Faculty of Science, Engineering and Agriculture higher degrees committee member.

NRF rating

2019-2024 South African National Research Foundation C₃ Rated Researcher.

Honours and Awards

- | | |
|-----------|---|
| 2022 | University of Venda Vice Chancellor's award for the 2020 research outputs. |
| 2019 | Awarded the World Bank Trust Fund for Statistical Capacity Building (WB TFSCB) to participate in the 62nd ISI World Statistics Congress in Kuala Lumpur, Malaysia. |
| 2019 | Awarded a University of Venda research grant in the niche area: Sustainable Rural and Regional Development. Value of Award R147,754.00. |
| 2018 | Knowledge Share award: SASA/NRF Academic Statistics in Crisis. Value of Award R20,000.00. |
| 2016 | Knowledge Share award: SASA/NRF Academic Statistics in Crisis. Value of Award R15,000.00. |
| 2016 | Awarded the DST-NRF Centre of Excellence in Mathematical and Statistical Sciences (CoE-MaSS) for funding a Workshop on Quantile Regression. Value of award R30,000.00. |
| 2015-2017 | Awarded the National Research Foundation (NRF) grant for Competitive Support for Unrated Researchers (CSUR). Project title "Probabilistic Load Forecasting". Value of award R728,500.00. |
| 2015 | Awarded the Faculty of Science Research start-up grant (Faculty of Science, University of Witwatersrand). Value of award R30,000.00. |
| 2014 | Awarded the Faculty of Science Research start-up grant (Faculty of Science, University of Witwatersrand). Value of award R30,000.00. |
| 2014 | Awarded the Dean's Research grant (Faculty of Science, University of Witwatersrand). Value of award R25,000.00. |
| 2014 | Vice Chancellor's research support (University of Witwatersrand). Value of award R15,000.00. |
| 2012 | Excellence award for being the best researcher in the School of Mathematical and Computer Sciences at the University of Limpopo, South Africa in 2012. Value of award R10, 000.00. |
| 2011 | Awarded the Knowledge Interchange Collaboration (KIC) travel grant by National Research Foundation (NRF) of South Africa to attend IFORS conference in Melbourne, Australia. Value of award R15,000.00. |

Current Membership of Professional Associations

- Chartered member in Statistical Sciences Facilitation: Institute of Certificated and Chartered Statisticians of South Africa (ICSSA). Membership Number: 13ChMo12.
<https://www.iccssa.org.za/membership/membershiplist/>
- International Institute of Forecasters (IIF). Member ID: 7178.
- International Statistical Institute (ISI). Member ID: 16577.
- South African Statistical Association (SASA). Member ID: 374268.

- I have peer-reviewed more than 50 journal articles from the following journals: Communications in Statistics - Theory and Methods; Applied Energy; IEEE Access; IEEE PES Transactions on Power Systems; IEEE Access; Entropy (MDPI); Forecasting (MDPI); Sensors (MDPI); Renewable & Sustainable Energy Reviews; SN Applied Sciences Springer Nature; Plos ONE; International Journal of Modelling and Simulation; Statistics, Optimization & Information Computing; South African Statistical Journal; International Journal of Electrical Power and Energy Systems; Journal of Energy in Southern Africa; Physica A: Statistical Mechanics and its Applications; Journal of Applied Statistics; Journal for Studies in Economics and Econometrics; Sustainable Cities and Society; Journal of Probability and Statistics; Journal of Disaster Risk Studies.

- **Reviewer recognition**
<https://www.webofscience.com/wos/author/record/1901098>
<https://reviewerhub.elsevier.com/review-history>

Research

- My research is on probabilistic electricity demand forecasting and renewable energy (solar and wind) systems integration modelling.
- My research interests are in: Probabilistic forecasting, Time series analysis, Statistics of extremes, Statistical learning and modelling, Exploratory data analysis.

Postgraduate Supervision

I have supervised students' dissertations at undergraduate and post-graduate levels in statistics. I have supervised more than 25 honours projects, 23 Masters's students, of which 16 I am the main supervisor and 7 as a co-supervisor, and 3 PhD students (1 as main supervisor and 2 as a co-supervisor) to completion. I currently supervise 3 Ph.D. and 1 Masters's students.

*MSc - Completed***MSc by research dissertation (Main Supervisor)**

1. Hierarchical forecasting of monthly electricity demand. Ignituous Chauke (University of Venda) 2022. <https://univendspace.univen.ac.za/handle/11602/2298?show=full>
2. Forecasting wavelet de-noised global horizontal irradiance using attention-based long short-term memory network Ndamulelo I Nelwamondo (University of Venda) 2022. <https://univendspace.univen.ac.za/handle/11602/2237?show=full>
3. Renewable energy forecasting in South Africa. Mamphaga Ratsilengo (University of Venda) 2021. <https://univendspace.univen.ac.za/handle/11602/1789?show=full>
4. Forecasting hourly solar irradiance in South Africa using machine learning models. Tendani Mutavhatsindi (University of Venda, South Africa), 2020. <http://univendspace.univen.ac.za/handle/11602/1664?show=full>
5. Short-term wind power forecasting in South Africa using neural networks. Lucky Oghenechodja Daniel (University of Venda, South Africa), 2020. <http://univendspace.univen.ac.za/handle/11602/1591?show=full>
6. Forecasting hourly electricity demand in South Africa using machine learning models. Maduvhahafani Thanyani (University of Venda, South Africa), 2020. <http://univendspace.univen.ac.za/handle/11602/1595?show=full>
7. Hierarchical forecasting of electricity demand in South Africa. Rofhiwa Netshiomvani (University of Venda, South Africa), 2020. <http://univendspace.univen.ac.za/handle/11602/1660?show=full>
8. Probabilistic solar power forecasting: An application to South African data. Phathutshedzo Mpfumali (University of Venda, South Africa), 2019. She was on the NRF project on Probabilistic Load Forecasting (2015-2017). <http://univendspace.univen.ac.za/handle/11602/1349?show=full>
9. Modelling the extremal dependence structure of equity returns: A survey of four African equity markets. Samuel Taiwo Abayomi Richard (University of Venda, South Africa), 2019. <http://univendspace.univen.ac.za/handle/11602/1356?show=full>
10. Forecasting foreign direct investment in South Africa using nonparametric quantile regression models, by Nyawedzeni Netshivhazwaulu (University of Venda, South Africa), 2019. <http://univendspace.univen.ac.za/handle/11602/1297?show=full>
11. Short-term load forecasting using quantile regression with an application to the unit commitment problem, by Moshoko Emily Lebotsa (University of Venda, South Africa), 2018. Was on NRF project on Probabilistic Load Forecasting (2015-2017). <http://univendspace.univen.ac.za/handle/11602/1208?show=full>
12. Medium-term load forecasting using generalised additive models with tensor product interactions. Thakhani Ravele (University of Venda, South Africa), 2018. <http://univendspace.univen.ac.za/handle/11602/1165?show=full>

13. Stochastic modelling of daily peak electricity demand using extreme value theory Jerry Boano Danquah (University of Venda, South Africa), 2018. Was on NRF project on Probabilistic Load Forecasting (2015-2017). <http://univendspace.univen.ac.za/handle/11602/1209?show=full>
14. Short-term hourly load forecasting in South Africa using neural networks by Elvis Tshiani Ilunga (University of the Witwatersrand, Johannesburg, South Africa), 2018. <http://wiredspace.wits.ac.za/xmlui/handle/10539/25629>
15. Modelling annual flood heights of the Limpopo river at Beitbridge border post using extreme value theory, by Robert Kajambeu (University of Venda, South Africa), 2017. <http://univendspace.univen.ac.za/handle/11602/676?show=full>
16. Modelling temperature in South Africa using extreme value theory by Murendeni Maurel Nemukula (University of the Witwatersrand, Johannesburg, South Africa), 2017. Nemukula was on the NRF project on Probabilistic Load Forecasting (2015-2017). <http://wiredspace.wits.ac.za/handle/10539/24840>
17. Modelling short-term probabilistic electricity demand in South Africa by Molete Mokhele (University of the Witwatersrand, Johannesburg, South Africa). Molete was on the NRF project on Probabilistic Load Forecasting, 2016. <http://wiredspace.wits.ac.za/handle/10539/21021>

MSc by research dissertation (Co-Supervisor)

1. Multilevel modelling of determinants of contraceptive method choice among women in South Africa. Nematswerani Phumudzo (University of Venda) 2021. <https://univendspace.univen.ac.za/handle/11602/1787?show=full>
2. A Bayesian multilevel model for women unemployment in South Africa. Vutshilo Ramarumo (University of Venda) 2021. <https://univendspace.univen.ac.za/handle/11602/1814?show=full>
3. Variable selection in discrete survival models. Coster Mabvuu (University of Venda, South Africa), 2020. <http://univendspace.univen.ac.za/handle/11602/1552?show=full>
4. Variability and long-term trends of climate extremes over the Limpopo, South Africa by Thendo Sikhwari (University of Venda, South Africa), 2019. <http://univendspace.univen.ac.za/handle/11602/1485?show=full>
5. A comparison of some methods of modelling the baseline hazard function in discrete survival models by Mahlageng Retang Mashabela (University of Venda, South Africa), 2019. <http://univendspace.univen.ac.za/handle/11602/1498?show=full>
6. Discrete survival models with flexible link functions for age at first marriage among women in Swaziland. Thambeleni Portia Nevhungoni, 2019. <http://univendspace.univen.ac.za/handle/11602/1346?show=full>
7. Modelling Volatility and Financial Market Risks of Shares on the Johannesburg Stock Exchange by Monnye Rhoda Makhwiting (University of Limpopo, South Africa), 2014. <http://ulspace.ul.ac.za/handle/10386/1389>

PhD - Completed

PhD (Main Supervisor)

1. Modelling volatility, equity risk and extremal dependence of the BRICS stock markets. Rosinah M Mukhodobwane (University of Venda, South Africa), 2021. <https://univendspace.univen.ac.za/handle/11602/2286?show=full>

PhD (Co-Supervisor)

1. Ndava Constantine Mupondo - Modelling Zimbabwean stock market liquidity and volatility. (2022). National University of Science and Technology, Zimbabwe.
2. Drought in Luvuvhu river catchment: Assessment, characterisation and forecasting. Fhumulani I Mativha (University of Venda, South Africa), 2020. <http://univendspace.univen.ac.za/handle/11602/1522?show=full>
3. Entrepreneurship gaps framework: An investigation into expectations vs. realities of entrepreneurship. Daniel Nheta (University of Venda, South Africa), 2020. <http://univendspace.univen.ac.za/handle/11602/1533?show=full>

PhD - Current students (Main supervisor)

1. Norman Maswanganyi - Long term peak electricity demand forecasting in South Africa using quantile regression (2016-2022). **Under examination.** University of Venda.
2. Edina Chandiwana - Short-term probabilistic solar power forecasting using Gaussian process quantile regression (2018-). University of Venda.
3. Thakhani Ravele - Probabilistic renewable energy modelling in South Africa (2019-). University of Venda.

PhD - Current students (Co-supervisor)

1. Richard A. Samuel - Stochastic modelling of volatility, leverage effects, long-memory and extremal dependence of financial markets. (2020-). University of the Witwatersrand, Johannesburg.

Examination of Masters' dissertations and PhD theses

I have examined more than 15 Masters's dissertations and 8 PhD theses.

PhD theses examined

- 2022: Stochastic Modelling of the Spread of Infectious Diseases. School of Statistics and Actuarial Science, University of the Witwatersrand, Johannesburg, South Africa.

- 2021: Statistical and deep learning methods in causal inference. School of Statistics and Actuarial Science, University of the Witwatersrand, Johannesburg, South Africa.
- 2020: Exact methods for single and multi-objective integer programming problems. Mathematical Sciences, College of Science, Engineering and Health, RMIT University, Melbourne, Australia.
- 2019: On the use of the bootstrap methods in uncovering the sampling distribution of threshold value estimates. School of Statistics and Actuarial Science, University of the Witwatersrand, Johannesburg, South Africa.
- 2019: Efficiency of the Structural Equation Model and Related Models in Validating the Theory of Planned Behaviour. Department of Statistics & Operations Research, North-West University, South Africa.
- 2017: Title of thesis: Inspection and replacement models for reliability and maintenance: Filling in gaps. School of Statistics and Actuarial Science, University of the Witwatersrand, Johannesburg, South Africa.
- 2016: Title of thesis: The relationship between electricity supply and economic growth in South Africa. Department of Economics, Nelson Mandela University, South Africa.
- 2014: Contributions to Accelerated Reliability Testing. School of Statistics and Actuarial Science, University of Witwatersrand, Johannesburg, South Africa.

Consulting

- 2012–2013 Danish Energy Management A/S: Part-time Energy efficiency monitoring expert and statistical consultant working on the project for monitoring energy efficiency and carbon dioxide emissions for the Department of Energy, South Africa, 1 January 2012 to 31 December 2013. Duties: Identify review priorities; establish data gaps; establish data collection system; methodology establishment and data gathering; refinement of methodology, collection, data handling and reporting.
- 2009–2010 Energy statistical consultant, Energy Demand Forecasting Project for Eskom, South Africa (1-07-2009 to 31-03-2010). Duties: Our task was to develop short-term forecasting models for hourly, daily and monthly electricity demand. The project was done in collaboration with the Nelson Mandela Metropolitan University.

Seminars, Workshops and Invited Talks Given

- 2020 Forecasting lecture to Eskom's Combined Forecasting Forum (CFF) on 8 December 2020.
- 2016 Research Seminar at Eskom on transmission and distribution network demand forecasting.
- 2016 Research visit to Eskom National Control Centre in Johannesburg, South Africa.
- 2016 ICCSSA/ORSSA/SASA breakfast seminar at Council for Scientific and Industrial Research (CSIR), Pretoria.
"Short term hourly load forecasting during the peak period using quantile regression with an application to the unit commitment problem".
- 2014 Public seminar "Winter peak electricity demand modelling in South Africa". Wits University.
- 2013 Data validation workshop for the National Development Plan of South Africa, Vision 2030 in Pretoria.
- 2010 Eskom workshop on Energy, Economics Statistics and Data mining: Heritage Conference Centre, South Africa.
- 2009 Workshop on Forecasting and Modelling in Energy and Finance: Department of Statistics and Centre for Energy Research, Nelson Mandela Metropolitan University, Port Elizabeth, in partnership with Eskom, South Africa. Title of paper presented: "A GARCH modelling approach to hourly electricity load forecasting".

Papers Presented at International Conferences

1. **Sigauke, C.** Estimation of extreme conditional quantiles of global horizontal irradiance: An application using South African data. The 41st International Symposium on Forecasting, virtual, 27-30 June 2021. https://www.youtube.com/watch?v=9Wm70rq7Qpc&list=PLUxduCQo6_X396goCKSfuZQ9XK145XMum&index=66
2. **Sigauke, C.**, Nemukula, M.M. and Maposa, D. Probabilistic hourly load forecasting. 62nd ISI World Statistics Congress, Kuala Lumpur, Malaysia, 18-23 August 2019.
3. **Sigauke, C.**, Nemukula, M.M. and Chikobvu, D. Impact of temperature extremes on electricity demand: A case study. 21st Conference of the International Federation of Operational Research Societies, Quebec, Canada, 17-21 July 2017.
4. Nemukula, M.M. and **Sigauke, C.** Modelling average maximum daily temperature using r largest order statistics: An application to South African data. 61st ISI World Statistics Congress, Marrakech, Morocco, 16-21 July 2017.
5. Nemukula, M.M. and **Sigauke, C.** Modelling average minimum daily temperature using extreme value theory with a time-varying threshold. 10th International Conference on Extreme Value Analysis, Delft University of Technology, The Netherlands 26-30 June 2017.
6. **Sigauke, C.** Modelling the effect of heatwaves on electricity demand: A case study. The 3rd International Conference on Energy and Environment Research, Barcelona, Spain, 7-11 September 2016.
7. **Sigauke, C.** Modelling extreme non-winter peak electricity demand: An application to South African data. The 36th International Symposium on Forecasting, Santander, Spain, 19-22 June 2016.
8. **Sigauke, C.** and Dowdeswell, M., Modelling peak electricity demand using extreme value theory with time-varying parameters: An application to South African data. The 35th International Symposium on Forecasting, Riverside, California, USA, 21-24 June 2015.

9. Dowdeswell, M. and **Sigauke, C.**, Non-stationary point processes and their extremes: an exploration of electricity demand in South Africa. The 9th International Conference on Extreme Value Analysis at the University of Michigan, Ann Arbor, June 15-19, 2015, USA.
10. Mokhele, M. and **Sigauke, C.**, Modelling summer daily peak load demands in South Africa using discrete-time Markov chain analysis. The 9th International Conference on Extreme Value Analysis at the University of Michigan, Ann Arbor, June 15-19, 2015.
11. **Sigauke, C.** and Chikobvu, D., A Markov chain analysis of daily changes to peak electricity demand in South Africa. The 34th International Symposium on Forecasting, Economic Forecasting Past, Present and Future, Rotterdam, The Netherlands, 29 June to 2 July 2014.
12. Chikobvu, D., **Sigauke, C.** and Verster, A., Winter peak electricity load forecasting in South Africa using extreme value theory with a Bayesian flavour. Poster presented at the International Society for Bayesian Analysis, June 2012 Conference, Kyoto, Japan.
13. **Sigauke, C.** and Chikobvu, D., Modelling daily peak electricity load forecasting in South Africa using a multivariate nonparametric regression approach. 19th Triennial Conference of the International Federation of Operations Research Societies, Melbourne, Australia, July 10-15 2011. Chaired the invited session FC-1: OR, Energy, and Africa in stream OR Applications in Energy.
14. Chikobvu, D. and **Sigauke, C.**, Modelling daily peak electricity demand in South Africa using SARIMA and RegSARIMA models. Second Isibalo Young African Statisticians' Conference, 1-3 December 2010, Pretoria, South Africa.
15. **Sigauke, C.**, An econometric study of currency crises in developing economies: the Zimbabwean case. 18th Triennial Conference of the International Federation of Operations Research Societies, Sandton Convention Centre, South Africa, July 13-18, 2008. Chaired the session MC-13 Finance Applications.

International Conferences Attended without a presentation

1. **Sigauke, C.** The 42nd International Symposium on Forecasting, virtual, July 10-13, 2022 in Oxford, England.
2. **Sigauke, C.** The 40th International Symposium on Forecasting, virtual, 26-28 October 2020. <https://isf.forecasters.org/overview/about/locations/>
3. 26-30 July 2015: IEEE Power & Energy Society General Meeting, Powering up the next generation, Denver, Colorado, USA. Attended a full-day tutorial on Energy Forecasting in the Smart Grid Era.

International Research visits

1. Research collaboration visit: Department of Mathematical Sciences, University of Malawi, 30 October 2017 to 3 November 2017. "Impact of temperature extremes on electricity demand: A case study".

2. Research collaboration visit: Lancaster Centre for Forecasting, Lancaster University, Management Science, 5 December-9, 2016. "Short-term electricity demand forecasting using quantile regression with an application to the unit commitment problem". <http://www.research.lancs.ac.uk/portal/en/people/search.html?search=Caston+Sigauke&uri=&filter=>

Computer skills

- Statistical Software: R, Eviews.
- Application: Ms Office, LATEX
- Learning Management System: Moodle, Microsoft Teams, Sakai.
- Operating System: Windows
- Reference Management Software: BibTeX
